

S8-900 Block Grand Avenue In-Line Transit Stations in Glenwood Springs, \$

(Hyperlink to ITSP Alternatives & Cost Estimates, click above link)

Project Description:

The City of Glenwood Springs and RFTA would like to extend BRT service to downtown Glenwood springs to allow BRT riders access to the downtown core. The existing north and south bound bus stops on the 900 block of Grand Avenue could be upgraded and amenities added, such as improved bus pull out areas, upgraded shelters, ticket vending machines, WIFI and next bus signage, to emulate the BRT stations.

Project Cost Estimate:

Original Project Cost Estimate:

\$867,593

Constrained Project Cost Estimate:

The project scope and cost has been reduced for this item to be included and funded under the 2.65 mill levy plan.

Constrained Project Cost - \$300,000

Special Considerations:

Construction in the any downtown core are is always challenging and access to utilities and ROW issues may impact costs.
